We carry out
complex geological
work in remote and
difficult terrains.

Wherever your property is, we
go there and get the job done.

Why should you hire Geo Squad to be your boots on the ground ?

We are an army of geologists and techs who can be mobilized or demobilized at any time.

We have a hundred junior geologists, supervised by experienced senior geologists.

We work according the NI 43-101 or JORC code.

We use solid logistical resources: helicopters, all-terrain vehicles, snowmobiles, mobile camps, mobile core sheds, etc...

Our teams are trained to work and live under changing harsh weather conditions.

Depending on your needs, we can carry out turnkey project, or only lend you temporary and flexible staff.

For increased efficiency, we use cutting-edge geoscientific instruments such as: portable XRF and LIBS analyzers, ground geophysics equipment, satellite-connected devices, etc...

We provide the best exploration workforce in Canada 🇨🇦
